

Team Travi

Project Topic

Travi – A Smart Travel Planning App for Social and Personalized Trip Design

The app aims to make travel planning more engaging, collaborative, and tailored—especially for groups of friends or young people inspired by social media. It reduces planning stress and helps turning inspiration into concrete plans

Results from desk research

Gen Z (18–27):

- ~3 trips/year.
- 88% use TikTok for travel inspo.
- High value on sustainability and authentic experiences

Millennials (28–35):

- ~5.6 trips/year
- Willing to spend >5,000€
- Prefer customized, wellness-oriented trips

Main Persona

Lisa (26, Gen Z Millennial Cusp)

Bio:

- Travels 3x/year, mostly weekend trips
- Uses TikTok and Instagram for inspiration
- Struggles with group coordination and final decisions ("travel more, stress less")

Average Annual Traveling Spend:

- ~2000 €

Key results from field research

- 8 participants (ages 20–50 including students, young professionals, family and friends)
- Conducted in Germany, across both urban and rural contexts

Travel Behaviour:

- Trips often planned with friends, partners, or family
- Planning is often spontaneous, especially among younger participants
- Preferences vary from short weekend trips to longer, well-organized vacations

Pain Points:

- Lack of central tools to collect and share ideas within a group
- Frustration with repetitive online searching (Especially with e.g. Check24, Booking or Airbnb)
- Decisions are made last-minute or not at all when options feel overwhelming

The Problem

Many interviewees find Travel planning frustrating and confusing

"It'd be cool to save and organize ideas together, like a group moodboard."

"We always talk about trips but rarely book anything."

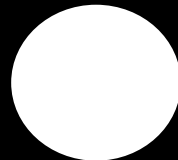

Actionable Problem:

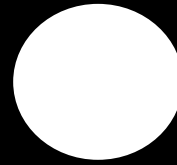

1. Endless searching, lack of inspiration
2. Group planning is chaotic and uncoordinated
3. Too many platforms lead to decision fatigue
