

Target Group:

Generation Z (approx. 18-30 years old), tech-savvy, travel-loving, often spontaneous, enjoys traveling with friends.

Problem Statement:

Travel planning is often time-consuming - especially in groups. Different ideas, interests, and timeframes make a joint decision difficult. Furthermore, there is often a lack of inspiration or suitable suggestions tailored to individual wishes.

Travi Solution Approach:

An AI-based app that suggests suitable travel destinations to users - based on personal or group-specific information - and utilizes a playful swipe principle.

Main Functions:**1. Solo Mode:**

- User enters travel data (date, budget, climate preferences, travel duration, interests, e.g., beach, culture, party, etc.).
- AI generates suitable travel destinations.
- User can rate travel suggestions by swiping (like/dislike).
- Ultimately, a "Perfect Match" travel destination is suggested.

2. Group Mode:

- Group is created via invitation code or link.
- Each group member enters their data/wishes.
- AI calculates suitable travel destinations for the entire group.
- Everyone swipes individually - the app finds commonalities in the likes.
- Ultimately, a travel destination that best suits everyone is suggested ("Group Match").

Interview Questions:**Travel Behavior:**

1. Do you prefer to travel:
 - Alone
 - With friends
 - With family
 - In groups with strangers (e.g., backpacking)
2. How often do you travel per year?
 - 0-1 times

- 2-3 times
 - 4-5 times
 - More than 5 times
3. How do you usually plan your trips?
- I do everything myself
 - Friends take over
 - Travel agency or platforms (e.g., Booking, Expedia)
 - We plan together in the group

App Usage & Interest:

4. Would you use an app that suggests travel destinations to you in a Tinder-style?
- Yes
 - No
 - Don't know
5. How interesting do you find the idea of choosing a travel destination together with friends by swiping?
- Very interesting
 - Quite okay
 - Rather uninteresting
 - Not interesting at all
6. Would you recommend such an app to your friends?
- Yes, definitely
 - Maybe
 - No

Functionality & Features:

7. Which of these functions would you use in the app? (Multiple selection possible)
- Swipe travel destinations in solo mode
 - Group travel planning with swipes
 - Suggestions based on interests/budget
 - In-app chat with group
 - Directly book flights/accommodations
 - Recommendations from other users
8. Would you provide personal data such as budget, timeframe, or interests, so that the app suggests suitable destinations?
- Yes, no problem
 - Only partially
 - No
9. How important is it to you that the app is easy and quick to use?

- Very important
- Rather important
- Not so important
- Unimportant
