

Problem:

What is the problem?

Through our interviews and research, we have discovered that there are some problems with group travel that cannot currently be solved with an app.

Group travel – especially with friends – is a popular but often stressful form of travel. Our primary and secondary research shows that the following problems occur repeatedly:

- **Communication:** Who agrees on what and when? Important information gets lost in the chat history.
- **Coordination:** Different interests, timings, budgets and availabilities collide.
- **Time consuming:** The discussion about where to go alone can drag on for weeks.
- **Decision making:** There is a lack of tools for selecting common goals democratically, quickly and fairly.
- **Cost Management:** Who pays what? And how do you settle accounts correctly among yourselves?

How did we find out?

These findings are based on:

- Interviews with potential users, primarily from Gen Z
- Observations of our own travel plans among our circle of friends
- Secondary data, e.g. from Statista, TravelPerk, CN Traveler and others (see sources in the document)

The sources cited confirm that digital solutions for group travel lag behind those for solo or package travel – despite the increasing relevance of this form of travel.

Summary of the primary and secondary research data collected:

Target group – focus on Gen Z:

Who is Gen Z?

- Born between approximately 1997 and 2012
- Digital natives – grew up with smartphones, apps and social media
- Visually oriented, love intuitive, mobile-first solutions
- Strongly influenced by social proof, recommendations and trends on TikTok & Instagram
- Want authentic, collaborative experiences, but with maximum self-determination

What does this mean for travel?

- Gen Z plans group trips more often than any other generation.

- 65% want to travel with friends, but 52% find the organisation stressful.
- Makes decisions based on emotions and circumstances, e.g. TikTok trends, other people's experiences.
- Expects digital tools that are simple, fun and socially integrated.

Why is Travi the solution here?

Travi addresses precisely these needs:

- Swipe system: playful, fast, visual – like Tinder & TikTok
- Group algorithm: fair target setting without power struggles
- All-in-one platform: planning, coordination, booking & billing in one app

Who is our persona?

Persona: Lisa (26, Gen Z Millennial Cusp)

Bio:

- Travels 3x/year, mostly weekend trips
- Uses TikTok and Instagram for inspiration
- Struggles with group coordination and final decisions ("travel more, stress less")

Average Annual Traveling Spend:

- ~2000 €
